TOPIC ---

When I start up my Macintosh, I get a message that System 6.0.5 needs
version 1.2 of 32-bit QuickDraw.

Where do I get this software?

DISCUSSION --

Version 1.2 of 32-bit QuickDraw is on the 6.0.5 Printing Tools disk inside
the Apple Color folder. You can use the installer script for 32-bit
QuickDraw or simply drag the icon into your System Folder.
