## PrintMonitor: Manual Feed and Flashing

Article Created: 19 April 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I recently installed System 6.0.5 and Finder 6.1.5. Now, when I print on my LaserWriter IINTX, the PrintMonitor flashes. I have to select it and then click OK to proceed. With System 6.0.3, selecting Print did the whole thing without my having to select PrintMonitor.

DISCUSSION -----

It sounds as if you have Manual Feed selected. Try again with Automatic Feed selected instead. If you have any doubts about the system upgrade, rerun the Installer to re-create the system files.
