Laser Fonts: Corrupted Font Problems

Article Created: 14 May 1991

TOPIC -----

I'm experiencing an intermittent problem when using the font "Times 12".

It sometimes does not use the whole line. No characters are lost; it simply prints the rest of the line on the next line.

Some documents do work, others don't. Generally if I take a file that does not work and either change the font style or size, it prints correctly. I tried re-installing the fonts with no success. I've taken the "bad" file and printed it on another computer and laser printer and it works!

DISCUSSION -----

This type of problem is usually caused by a corrupt font installed in the System; we would recommend at least replacing the font with Font/DA Mover, if not trashing and reinstalling the operating system with Installer.

If the problem persists, try reloading the application from diskette.
