## Norton Utilities and Enabler Bundle Resource (5/94)

Article Created: 6 May 1994

TOPIC -----

When I run Norton Utilities 2.0, it says that the bundle bit for my Enabler file has a problem. If I correct this or replace the Enabler with a fresh copy, the problem keeps returning.

DISCUSSION -----

Norton Disk Doctor is giving a false error message because it cannot properly check the active Enabler on the active system volume. You need to run Norton Disk Doctor while booted off the emergency disk. You will then not receive this error.
