Launcher: -39 Error (8/95)

Article Created: 21 August 1995

TOPIC -----

I get a -39 error when I try to open my Launcher. What does this mean and how can I fix it?

DISCUSSION -----

A -39 error is an end of file error. This error usually occurs when a file becomes damaged. If you are getting a -39 error when you try to open your Launcher, you should drag the Launcher out of the Control Panels folder and put it in the Trash. You can then reinstall the Launcher control panel from your backup disks, your Macintosh Performa CD, or your original System 7.5 CD or floppy disks.
