## RAM Disk: With Virtual Memory or RAM Doubling Software (9/95)

Article Created: 01 September 1995

TOPIC -----

I have 8mb of physical RAM installed and would like to have a 12mb RAM disk. Is it possible to use virtual memory or RAM doubler to "increase" my available RAM to 24mb and then use a 12mb RAM disk?

DISCUSSION -----

Virtual memory as well as RAM "doubled" programs like RAM Doubler can not be allocated for use as a RAM disk. The RAM disk option only addresses built-in physical RAM and will simply ignore any RAM that is virtual memory or created by software.
