## SCSI Manager 4.3.1: Use Custom Install of 7.5.1 on LC 575 10/95

Article Created: 2 October 1995

TOPIC -----

Why does SCSI Manager 4.3.1 not get installed on my Macintosh LC 575 by System 7.5 Update 1.0?

DISCUSSION -----

The Easy Install script of System 7.5 Update 1.0 will install SCSI Manager version 4.3.1 on the Macintosh LC 575 only if SCSI Manager 4.3 already exists in the System Folder you are updating. If SCSI Manager 4.3 is not already installed on your hard drive, use the custom install feature in System 7.5 Update 1.0 to install SCSI Manager version 4.3.1.
