QuickTime: Incompatibility with Third-Party Video Capture Boards

Article Created: 4 December 1992

TOPIC -----

When trying to capture video with Movie Recorder and a third-party video capture board, I sometimes get a system bomb, or sound but no video.

DISCUSSION -----

According to SuperMac Tech Support and TrueVision Tech Support there's a beta copy of a "VDIG" INIT that solves these problems. You can get the necessary "VDIG" INIT from video capture board vendors when the INIT is final.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
