Control Panel Map: Istanbul Time Zone (6/93)

Article Created: 29 June 1993

TOPIC -----

In the Control Panel Map, Istanbul is identified as being three hours ahead of GMT (Greenwich Mean Time.) It's only two hours ahead.

DISCUSSION -----

According to the National Geographic World Atlas, Istanbul is two hours ahead of GMT, not three as shown in the map. This error will be passed on to software engineering.

In the meantime, there is a workaround. Find Istanbul in the Map Control Panel, select Remove City. Change the Time Zone, then select Add City.
