## Macintosh: No Newton MessagePad Emulator Available (5/94)

Article Created: 16 May 1994

TOPIC -----

Is there an application which allows me to run Newton MessagePad applications on my Macintosh computer?

DISCUSSION -----

No, there are no applications that allow you to run newton applications on your Macintosh. Apple's Newton Toolkit (NTK), the development system for creating Newton applications on the macintosh, will not actually run Newton programs. Code is written in NTK and then downloaded to an actual Newton. The Newton Toolkit does not have a built in emulator.
