Network Administrator Toolkit: Default Password (7/96)

Article Created: 1 July 1996

Article Reviewed/Updated: 11 July 1996

TOPIC -----

I installed the Network Administrator Toolkit, and the first time I tried to launch Network Assistant Security and Network Assistant, each application asks for a password. What is the password?

DISCUSSION -----

The default password is "xyzzzy" for both Network Assistant Security and Network Assistant. Apple Computer strongly recommends that you change these passwords in order to ensure complete security.
