Simpletext 1.2: Cursor prints on QuickDraw Printers (5/96)

Article Created: 11 July 1995

Article Reviewed/Updated: 23 May 1996

TOPIC -----

When I print from SimpleText 1.2, the cursor prints out also. This happens when I print to my Apple StyleWriter Printer but not my LaserWriter Pro 630.

Is this a bug with my Apple StyleWriter Printer?

DISCUSSION -----

This is a known issue with SimpleText 1.2 and QuickDraw printers. This problem has been corrected in SimpleText 1.3. This version of SimpleText began shipping with QuickDraw 3D and is available on several online services.
