MacCheck: What It Is (8/93)

Article Created: 23 August 1993

TOPIC -----

This article describes the MacCheck application from Apple.

DISCUSSION -----

MacCheck is a diagnostic application from Apple Computer, Inc.

At this writing, MacCheck is bundled with the following systems:

- Macintosh Performa
- Macintosh LC 520
- Centris 660AV
- Quadra 840AV

It is also included on the Software Utility Update Disk, which is distributed free of charge on AppleLink and other online services.

MacCheck assists Macintosh owners by providing the following diagnostic tests:

1) MacCheck creates a profile of your Macintosh computer, including:

- The processor, memory, expansion cards, SCSI drives, keyboard, monitor, etc.
- The installed applications and system software on your startup drive

2) MacCheck performs a number of tests, including:

- A general logic board test
- File system and System files test
- Duplicate System Folders test
