## MacCheck: Test And Help Buttons Grayed Out (6/95)

Article Created: 20 September 1993

Article Reviewed/Updated: 16 June 1995

TOPIC -----

When I double-click on MacCheck, it loads the tests as usual, but the Test and Help buttons are grayed out and not available. I can only click on System Info and Quit.

DISCUSSION -----

This occurs when the application program doesn't reside in the same folder as the data file. Relocate MacCheck to the same folder as the data file, and you'll be able to use the test and help buttons.
