MacTest Pro: Can't Run RAM Test (10/94)

Article Created: 12 October 1994

If I run MacTest Pro on a Power Macintosh the RAM test is grayed out. How can
I get the RAM test to work on a Power Macintosh?

DISCUSSION ---

AppleTalk must be disabled in the Chooser before running the RAM test in MacTest
Pro. This is the most common cause of the RAM test being grayed out. Disable
AppleTalk and run the tests again.
