Apple Printer Utility: Can't See/Change Last Zone Printers 8/95

Article Created: 11 November 1994

Article Reviewed/Updated: 22 August 1995

TOPIC -----

I am having a problem using the Apple Printer Utility v1.0 that came with the LaserWriter 16/600 PS printer. I have a multi-zone network, and the LaserWriter 16/600 PS is in the last zone. When I select the last zone, the list of printers in the "Printers" box does not get updated and continues to display the printers that belong to the previous zone that was selected.

DISCUSSION -----

The original Apple Printer Utility v1.0 has a problem working with printers in the last zone of a multi-zone network, as well as networks that only have one zone (as that zone is effectively the last zone).

This problem is fixed in later versions of the Apple Printer Utility. As of this article, the current version is Apple Printer Utility v2.0.
