MacCheck 1.0.3: Missing a file record... Error (12/94)

```
Article Created: 1 December 1994

TOPIC -----------------------------------------------------------

I am using MacCheck version 1.0.3, and received the following error messages:

"Missing a file record for file thread "1184, 326", "1209, 326" , "1210,
326", and more. I ran Disk First Aid, and got no error messages. Norton
Utilities found some errors that it could fix, but I would like to know what
these error messages mean.

DISCUSSION ------------------------------------------------------

The error message you are seeing is from an older version of MacCheck. It is
actually giving you more detail than is necessary, or helpful.  It refers to an
index in the catalog tree.

We believe that error message may result from a problem in MacCheck version
1.0.3. Release 1.0.4 of MacCheck actually incorporates some Disk First Aid
code, and would not give these messages. It doesn't sound like there is an
actual problem with your system because Disk First Aid would have flagged a
problem.

MacCheck v1.0.5 was the last version of MacCheck to be released.
