CloseView: Can it Do Screen Inversion Only? (6/95)

Article Created: 26 May 1995

Article Reviewed/Updated: 1 June 1995

TOPIC -----

I have vision impairment and prefer the video to be inversed in CloseView. I do not need the zoom effects. How can I do this? Is there a ResEdit or third party solution?

DISCUSSION -----

There is no ResEdit solution available to do this. However there is a solution available from Berkeley Access called inLarge. inLarge lets you enable just "screen inverse" functionality. You can download a version of the software via the Internet at:

<http://access.berksys.com/>

or from AppleLink at:

- . Community Connection
- . Disability Solutions
- . Empower BB
- . Access Software Library (Share & Freeware)
- . Vision
- . inLarge 2.0a Demo

Please note that version 2.0a of inLarge is not compatible with Power Macintosh systems. Contact Berkeley Systems directly for information about the availability of a compatible version.

This article provides information about a non-Apple product. Please contact the vendor for additional information.

The Tech Info Library article titled "Locating Vendor Information" can help you search for a particular vendor's address and phone number.
