## CD-ROM Setup 5.1.2: Multisessions Create Multiple Icons (8/96)

Article Created: 14 December 1995

Article Reviewed/Updated: 19 August 1996

TOPIC -----

I am using CD-ROM Setup 5.1.2 on my Macintosh, with a Kodak CD Writer. I am creating multisession CD-ROM discs, and I just started using CD-ROM Setup 5.1.2. Previously, the disc displayed on the Macintosh desktop as a single icon. Now with CD-ROM Setup 5.1.2 installed, multiple icons for the disc appear on my desktop. The number of icons that appear are equivalent to number of sessions I placed on the CD-ROM Disc.

DISCUSSION -----

This is the normal behavior of multisession CD-ROM Discs. Multisession CD-R discs appear as multiple volumes on the Macintosh desktop. If you change the name of the session when you create a new partition, it has a different name on the desktop.
