## Apple System Profiler: Read Me (5/96)

Article Created: 02 May 1996

TOPIC -----

This article contains the ReadMe file for Apple System Profiler v1.0 and v1.0.1, which are available to Apple Macintosh users.

DISCUSSION -----

Apple System Profiler (ASP) lets you gather information about the configuration of your computer. The information that ASP reports may be useful if you place a call to the Apple User Assistance Center.

If you have one of the computers listed below, we recommend that you install Apple System Profiler now. Note that you MUST be running Mac OS version 7.5.2 or 7.5.3 to successfully install Apple System Profiler.

- Power Macintosh 9500, 8500, 8100, 7600, 7500, 7200, 7100, 6100, 5400, 5300 and 5200 series.
- PowerBook 5300, 2300 and 190 series.
- Macintosh Performa 6300, 6200, 6100, 5300 and 5200 series.

Apple System Profiler will only install on the computers listed above. Do NOT attempt to install it on any other computers.

Installation instructions:

1. Locate the Apple System Profiler Installer. It is in the same folder as this document.
2. Double-click on the Apple System Profiler Installer application.

You'll see a confirmation message when installation is complete. The Apple System Profiler will be placed in the Apple menu. To use ASP, open the Apple menu and choose Apple System Profiler.
