## V-Twin Information Access Toolkit (1/97)

Article Created: 25 January 1997

TOPIC -----

This article provides a summary of V-Twin and the URL for more information.

DISCUSSION -----

V-Twin is the code name for the information access toolkit developed in the Apple Research Labs (formerly known as ATG). V-Twin provides fast and efficient text indexing and search for use by a variety of applications. Eventually, Apple believes V-Twin will enable a new generation of "content-aware" applications.

Additional information can be found on the internet at the following URL:
