Desktop Patterns: Pattern Settings Stored In System File (2/97)

Article Created: 20 February 1997

TOPIC -----

Where are the desktop and utility pattern settings configured by the Desktop Patterns application stored? I've tried copying the Desktop Pattern Prefs file from the Preferences folder from one computer in my lab to another, but on startup none of them assume the desktop pattern of the original computer.

DISCUSSION -----

The collection of patterns from which you may choose is stored in the Desktop Pattern Prefs file. You can transport one collection of patterns between computers by moving this file alone.

The desktop and utility pattern choices you make with the Desktop Pattern application are written directly to the 'ppat' resource of the System suitcase. These pattern choices can be altered with the Desktop Patterns application; an AppleScript, QuicKeys, or Frontier script designed to perform the same function; or by using a resource editor like ResEdit and modifying the 'ppat' system resource.

The Desktop Patterns application is a component of System 7.5 and later and is located in the Control Panels folder.

WARNING:

This article refers to using ResEdit to alter your system software. Apple Computer, Inc., is not liable for any damage done to your software through the use of ResEdit to alter the software. The Apple Assistance Center phone representatives (at 800-SOS-APPL) do not provide technical support for ResEdit. It is supported by APDA.
