InitCdev 2.0: Using with Virus Detectors May Cause Problems

This article last reviewed: 5 February 1990

TOPIC ---

I've been using InitCdev 2.0, a freeware INIT management utility. Today, I
installed the AppleComm Toolbox on my system.

When I invoke InitCdev, it crashes with ID=17 (package 0 not present--list
manager). Can you explain?

DISCUSSION ---

Your problem may be the order in which your INITS are loaded.

We tested the InitCdev with the Toolbox. After moving a couple of virus
detectors around, so that SAM Intercept loads BEFORE the InitCdev, and Vaccine
loads AFTER InitCdev, the Apple Communication Toolbox worked great.

Some virus detectors don't respond well to the way this INIT manipulates them.
