GARFIELD 2 and MDEF Virus: Definition

This article last reviewed: 28 September 1990

The GARFIELD 2 virus, also known as MDEF, was discovered 13 August 1990. It is a variation of the GARFIELD virus that originated at Cornell University. It renumbers the system menu definitions of System files, resulting in odd menu behavior, no menu pop-down, odd system behavior, and odd application behavior.

To add a new virus definition to SAM 2.0, enter the following information:

Virus Name: GARFIELD

Resource Type: MDEF

Resource ID: 0

Resource size: ANY

Search String: A9A92F0CA9AA2F0CA9B0

String Offset: ANY
