WiggleWorks: Story Line Input Limit (10/95)

Article Created: 11 October 1995

TOPIC -----

When I try to input more than three lines of text in the Birds on Stage section of the WiggleWorks program, my computer just beeps instead of taking in any more input.

DISCUSSION -----

The guide that is included with the WiggleWorks CD-ROM disc incorrectly states that you can input up to eight lines of text. The limit is, in fact, 256 characters. There is no dialog box or error message stating that this limit has been exceeded, only a system beep response as you continue to type on the keyboard.

There is no way to type beyond the 256 character limit.
