A/UX: nfsad Support (6/95)

Article Created: 25 January 1991
Article Reviewed/Updated: 1 September 1994

TOPIC ---

I'm testing Wollongong's PathWay NFS client product for Macintosh OS with
my TCP-accessible A/UX host. The Wollongong documents refer to nfsad (NFS
Authentication Daemon), which must be installed on the nfs server. Does
A/UX support nfsad?

DISCUSSION --

A/UX 3.0 supports the improved version of NFS, which is NFS SRC 3.0 and
version 2 of the protocol from Sun Microsystems. NFS SRC 3.0 and protocol
version 2.0 do support the authentication check. However, the "nfsad"
daemon mentioned in Wollongong documents isn't part of the A/UX NFS
programs. We don't know why Wollongong PathWay NFS clients need "nfsad"
installed on the NFS server.
