TOPIC -----

How do I prepare a DB-25 loopback plug to run AppleCAT on a LaserWriter?

DISCUSSION -----

Prepare a DB-25 loopback plug by connecting Pin 4 to Pin 23 with a jumper wire. Plug this into the RS-232 connector of the LaserWriter before running AppleCAT.

The DB-25 loopback plug is required for a signal to be properly transmitted to the LaserWriter in the performance of the AppleCAT diagnostic.
