AppleLine: Password Request Caused by Supervisory Mode

Article Created: 13 January 1992

TOPIC ---

I'm using AppleLine and MacTerminal to connect to a 3270. This has worked
fine for many years, but suddenly I'm being asked for a password to get on
the system.

Does AppleLine have any passwords?

DISCUSSION---

Your AppleLine may have gone into "supervisory mode", used to modify
operation parameters and set passwords. The standard default, or beginning
password, is "APPLES".
