ADSP: Maximum Simultaneous Sessions (10/93)

Article Created: 5 October 1993

* RESTRICTED: Apple Internal and Support Providers Only *
Not For General Public Release

TOPIC -----

Is there a limit in ADSP to simultaneous connections? This is in regards to a 4th Dimension database that is being developed.

DISCUSSION -----

ADSP sessions don't correspond with a one-to-one pairing with sockets. ADSP multiplexes sessions on a single socket. You will probably run out of memory for sessions before you ever run out of sessions IDs, as you are only limited by the amount of free RAM available for creating sessions.
