## Apple OneScanner: Scanning Small Areas (12/93)

Article Created: 14 December 1993

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

Whenever I try to scan narrow documents with Ofoto, the system hangs or crashes.

DISCUSSION -----

ROM version 2.03 will fix that problem. The only way to obtain that is to swap the logic board.

The ROM revision can be determined using SCSI PROBE version 3.4 or greater. The ROM version can also be determined by the service diagnostics.

A workaround would be to use the manual scan mode and prescan at a larger than 2.13" size. Then crop to the desired size and scan. You run into the problem only during PRESCAN.
