Power Macintosh 7100	AppleCD 300i or AppleCD 300i Plus
Power Macintosh 8100	AppleCD 300i or AppleCD 300i Plus

The AppleCD 300i has not been qualified in computers where it is not listed as compatible, so there could be problems. Only the AppleCD 300i Plus has been tested combination in those computers.

The AppleCD 300i Plus upgrade kits include the extra SCSI cable necessary for the Power Macintosh 8100 enclosure. These cable are not needed in Quadra 800 or 840AV computers.

The existing CD upgrade kits can be installed in all machines except the Power

Macintosh 8100. It is possible to use the existing CD upgrade kits in the Power Macintosh 8100 with the addition of a SCSI cable (590-0877). However Apple does not recommend or support that combination.

Article Change History:

07 Sep 1995 - Made minor corrections.

19 Apr 1994 - Added AppleCD 300i as compatible with Power Macintosh.
