## Apple Multiple Scan 17 Display: No Video Mirror Support (7/94)

Article Created: 7 July 1994

Not For General Public Release

TOPIC -----

I noticed that when I connect the PB540c to an external Apple Multiple Scan 17 Display and turn on video mirroring mode, it doesn't project to the full screen size but rather only use the center portion of the external monitor. Is this normal? Can we make it use of the full screen but still at 640x480 resolution for video mirroring?

DISCUSSION -----

The Apple Multiple Scan 17 Display behavior you experienced is normal.

Engineering is investigating the possibility of taking advantage of the entire screen, but there is no firm commitment to do the project.
