TOPIC --

I need to know the transfer rate and SCSI ID jumper settings on the 2 GB IBM
hard disks?

DISCUSSION ---

Transfer rates
==============

Transfer rate/average seek time: Less than or equal to 10ms
Rotational speed: Greater than or equal to 5400rpm
Sustained Data Rate: Greater than or equal to 5 MBytes/sec

SCSI ID Numbers
===============

As you look at the 50-pin SCSI connector, the first two pins 1 and 2 are
missing. The SCSI ID Select Pins are pins 3 thru 8.

Pins 3 & 4 = ID #2
Pins 5 & 6 = ID #1
Pins 7 & 8 = ID #0

If you are using this drive as an external drive you need to enable active
termination by putting a jumper across pins 13 & 14.

Article Change History:
31 Jul 1995 - Corrected misspellings; reviewed for accuracy.
26 Jan 1995 - Added transfer rates.
