TOPIC ------------------------------------------------------------

What are the SCSI ID settings of the IBM 1 GB internal hard disk (661-0228).

DISCUSSION -------------------------------------------------------

The 1GB IBM HDA SCSI ID settings are detailed below. The connection is located on the bottom side of the drive, just opposite of the Power Connector. Jumper 1 will be located next to the inside corner of the board.

```
Jumper 1    2    3    4    5    6    7

.       Device ID
.       A0*  A1   A3

.       •    •    •    •    •    •    •
.       •    •    •    •    •    •    •
```

Jumper 4: Disable Auto Spin up
Jumper 5: Disable Unit Attention
Jumper 6: Enable Termination
Jumper 7: Disable TI Negotiation

A0 = Least significant bit.
