## Color STW 2400/2500: No ColorSync or Scatter with GX (1/97)

Article Created: 21 December 1994

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

Why are the "Scatter" and ColorSync options not available with the Color StyleWriter 2400/2500 GX print driver?

DISCUSSION -----

The Scatter printing option is not available because originally, QuickDraw GX v1.0.1 (base version for the CSW 2400 GX) was limited in its halftone screening capability. With QuickDraw GX v1.1 and beyond, the capability exists, however engineering currently has no plans to update any of the drivers to provide this capability. There are simply too many other driver development projects with higher priority at the current time.

ColorSync is automatically used with QuickDraw GX, so it is no longer an option.
