## Compatibility Between Apple Networking Products (1/97)

Article Created: 28 April 1995

Article Reviewed/Updated: 29 January 1997

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

### TOPIC -----

This article provides information showing compatibility between different Apple networking products. The products are arranged in the order shown below:

- 1) PowerShare Collaboration Server
- 2) AppleShare File Server
- 3) Apple Remote Access (ARA) Personal Server
- 4) Apple Remote Access (ARA) Multi-Port Server
- 5) Apple Internet Router
- 6) Apple IP Gateway Software

### DISCUSSION -----

- 1) PowerShare Collaboration Server

- AppleShare File Server
  - PowerShare 1.1 is compatible with AppleShare 4.0.1 Tune-up update installed. See TECHINFO-0014384.
  - Will not work with AppleShare 4.2.x that is running in addition with Open Transport 1.1. PowerShare is not compatible with OT.
- Apple Remote Access Personal Server
  - Will work together with no problems.
  - Will not work with ARA Personal Server that is running in addition with Open Transport 1.1. PowerShare is not compatible with OT.
- Apple Remote Access Multi-Port Server
  - Will work together with no problems.
  - Will not work with ARA Multi-Port Server that is running in addition with Open Transport 1.1. PowerShare is not compatible with OT.
- Apple Internet Router
  - Will work together with no problems.
  - PowerShare and Apple Internet Router are not compatible with Open Transport.

- Apple IP Gateway Software
  - Will work together with no problems. See TECHINFO-0016036
  - PowerShare and Apple IP Gateway are not compatible with Open Transport.

## 2) AppleShare File Server

---

- PowerShare Collaboration Server
  - PowerShare 1.1 is compatible with AppleShare 4.0.1 Tune-up update installed. See TECHINFO-0014384.
  - Will not work with AppleShare 4.2.x that is running in addition with Open Transport 1.1. PowerShare is not compatible with OT.
- Apple Remote Access Personal Server
  - Will correctly together. ARA Personal Server must be 2.0.1 or better to run with AppleShare 4.2.x and Open Transport.
- Apple Remote Access Multi-Port Server
  - AppleShare 4.0.1 Tune-up update must be installed to work with ARA Multiple Server. See TECHINFO-0014384.
- Apple Internet Router
  - Apple Internet Router is compatible with AppleShare 4.0.1 Tune-up update installed. See TECHINFO-0014384.
  - Apple Internet Router is not compatible with Open Transport.
- Apple IP Gateway Software
  - Will work together with no problems. See TECHINFO-0016036
  - Apple IP Gateway is not compatible with Open Transport.

## 3) Apple Remote Access Personal Server

---

- PowerShare Collaboration Server
  - Will work together with no problems.
  - Will not work with ARA Personal Server that is running in addition with Open Transport 1.1. PowerShare is not compatible with OT.
- AppleShare File Server
  - Will correctly together. ARA Personal Server must be 2.0.1 or better to run with AppleShare 4.2.x and Open Transport.
- Apple Remote Access Multi-Port Server
  - Is not compatible with the ARA Personal Server.
- Apple Internet Router
  - Is not compatible with the ARA Personal Server.
  - Apple Internet Router is not compatible with Open Transport.
- Apple IP Gateway Software
  - Will work together with no problems. See TECHINFO-0016036

- Apple IP Gateway are not compatible with Open Transport.

#### 4) Apple Remote Access Multi-Port Server

-----

- PowerShare Collaboration Server
  - Will work together with no problems.
  - Will not work with ARA Multi-Port Server that is running in addition with Open Transport 1.1. PowerShare is not compatible with OT.
- AppleShare File Server
  - AppleShare 4.0.1 Tune-up update must be installed to work with ARA Multiple Server. See TECHINFO-0014384.
- Apple Remote Access Personal Server
  - Is not compatible with the ARA Multi-Port Server.
- Apple Internet Router
  - ARA Multi-Port v2.1 and better will work with Apple Internet Router, as long as the Built-In Port enabler software is NOT installed, thus leaving both Modem and Printer Ports free.
  - See TECHINFO-0011763.
  - Apple Internet Router is not compatible with Open Transport.
- Apple IP Gateway Software
  - Will work together with no problems. See TECHINFO-0016036
  - Apple IP Gateway is not compatible with Open Transport.

#### 5) Apple Internet Router

-----

- PowerShare Collaboration Server
  - Will work together with no problems.
  - PowerShare and Apple Internet Router are not compatible with Open Transport.
- AppleShare File Server
  - Apple Internet Router is compatible with AppleShare 4.0.1 Tune-up update installed. See TECHINFO-0014384.
  - Apple Internet Router is not compatible with Open Transport.
- Apple Remote Access Personal Server
  - Is not compatible with the Apple Internet Router.
  - Apple Internet Router is not compatible with Open Transport.
- Apple Remote Access Multi-Port Server
  - ARA Multi-Port v2.1 and better will work with Apple Internet Router, as long as the Built-In Port enabler software is NOT installed, thus leaving both Modem and Printer Ports free.
  - See TECHINFO-0011763.
  - Apple Internet Router is not compatible with Open Transport.
- Apple IP Gateway Software

- Will work together with no problems. See TECHINFO-0016036
- Apple IP Gateway are not compatible with Open Transport.

## 6) Apple IP Gateway Software

-----

- PowerShare Collaboration Server
  - Will work together with no problems. See TECHINFO-0016036
  - PowerShare and Apple IP Gateway are not compatible with Open Transport.
- AppleShare File Server
  - Will work together with no problems. See TECHINFO-0016036
  - Apple IP Gateway is not compatible with Open Transport.
- Apple Remote Access Personal Server
  - Will work together with no problems. See TECHINFO-0016036
  - Apple IP Gateway are not compatible with Open Transport.
- Apple Remote Access Multi-Port Server
  - Will work together with no problems. See TECHINFO-0016036
  - Apple IP Gateway is not compatible with Open Transport.
- Apple Internet Router
  - Will work together with no problems. See TECHINFO-0016036
  - Apple IP Gateway is not compatible with Open Transport.

### Article Change History:

- 29 Jan 1997 - Updated article and revised format.
- 29 May 1996 - Added Open Transport.
- 01 May 1995 - Made correction.
