TOPIC ---

I am using the Color StyleWriter Pro printer with driver version 1.5.2 and
Desktop Printing software 1.0.3. Whenever I select "Check alignment before
printing" in the Utilities section of the print dialogue, the computer will
crash with a bus error during the alignment procedure.

DISCUSSION --

This problem has been verified by engineering. This crash occurs when you have
Desktop Printing enabled and try to run the print alignment routine.

The problem is related to the method that the drivers use to communicate with
the printers during certain functions. The solution has been identified by
engineering and is scheduled to be fixed in the next revision of the Desktop
Printing software.

To avoid this crash in the mean time, either turn off background printing in the
Chooser when you want to use the alignment feature or use the Extensions Manager
to disable Desktop Printing at Startup.
