TOPIC -----

There have been several questions about the Macintosh Display Card 8•24 with respect to some incompatibility between the new card and the old ones. Several people have stated that the Adobe Type Manager does not work on the Macintosh Display Card 8•24.

Is it a temporary problem, or will Adobe have to rewrite their application?

DISCUSSION -----

We talked to Adobe Technical Support. They told us that the Adobe Type Manager and the Macintosh Display Card 8•24 work fine together, as long as the following criteria are met:

- System Software 6.0.5 is installed
- 32-bit QuickDraw is installed
- Adobe Type Manager 1.2 is installed.
