DAL: Server for Oracle Running on AIX

Article Created: 17 January 1992

TOPIC ---

Is there a DAL Server for Oracle running on AIX?

DISCUSSION --

Pacer Software has licensed DAL from Apple and has been working on DAL
Servers for UNIX platforms, such as for SunOS, HP/UX, DEC Ultrix, and IBM
RS/6000 AIX. The RS/6000 product was to be released during first calendar
quarter of 1992. We don't know which database they support. Please contact
Pacer Software directly for more information.

Most of the query tools that support DAL (like ClearAccess, DataPrism, and
GQL) also support SQL*NET, Oracle's proprietary protocol for database
access. So, if you're only planning to access Oracle, you don't necessarily
need DAL on AIX to get the functionality you're looking for.

On AppleLink, you can find contact information for the various vendors by
clicking the Library Index button to view the folder structure in the Tech
Info Library. An alphabetic listing of vendors is in the Third Party
Company Directory folder.
