## DAL: DAL over TCP/IP for VAX/VMS Not Supported by Apple

Article Created: 14 May 1992

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

Does Apple support TCP/IP as a network protocol for getting access from a Macintosh to a DAL server running under VMS on a VAX?

DISCUSSION -----

We aren't supporting DAL over TCP/IP for the VAX/VMS Server. DAL engineering is looking into supporting it in the future. One of the problems is that there are so many flavors of TCP/IP on the market for VAX/VMS that we have to choose what to support. If you have any input as to which TCP/IP package we should support for VAX/VMS, please send your suggestion to Support Readiness via the AppleLink address PIONEER.
