## DAL: Supports Only the Two-Task Driver for ORACLE on VAX/VMS

Article Created: 7 August 1992

\* RESTRICTED: Apple Internal and Support Providers Only \*  
Not For General Public Release

TOPIC -----

This statement is in the ORACLE manual:

"The DAL database interface for ORACLE uses the Oracle SQL\*Net Two-Task driver under VAX/VMS."

Do you know if there's an alternative interface to use ORACLE and DAL under VAX/VMS? The reason for asking is that we don't install the Oracle SQL\*Net Two-Task driver due to performance degradation.

DISCUSSION -----

Currently, DAL only supports the two-task driver for the ORACLE database on VAX/VMS. Engineering is looking at other driver support, but we don't have any timeframe for it. We'll forward this information to Engineering as an enhancement request.
