TOPIC ---

I'm using DAL running on a middleware machine to link ClearAccess to
Sybase. I'm having problems connecting to the latest version of Sybase
version 4.9.1, because of changes to their system tables. I'm running DAL
version 1.3-001, will the right version of DAL salve the problem? DAL and
Sybase is running on a VAX running VMS version 5.4-2

I'm checking with Sybase. Any advice would be appreciated?

DISCUSSION --

As of 6/93 the released version of DAL for VAX/VMS is 1.3.6, and it was
tested with Sybase 4.0. Sybase changed a few things starting with version
4.8, including some libraries. The next DAL release 1.4, scheduled for
later this year, will support Sybase version 4.8 and 4.9.1.
