DOS Compatibility Card: Using w/LaserWriter Select 310 (10/95)

Article Created: 9 October 1995

TOPIC ---

I have a DOS Compatibility Card, and I am trying to print to a LaserWriter
Select 310. However, I keep getting an error that says the job may exceed the
printer's capacity - try reducing the number of fonts. I have tried reducing the
number fonts and reinstalling the System software, but that has not helped.

DISCUSSION --

In order to print to the LaserWriter Select 310 from the DOS Compatibility Card,
you need to turn background printing ON. With background printing ON, you can
print from the DOS Compatibility Card, but it will be slow--In some cases it
might take as long as five minutes per page.
