ImageWriter LQ: When It Prints Only One Line

Article Created: 13 August 1991

Not For General Public Release

TOPIC -----

My ImageWriter LQ prints one line then goes off line and then the error light comes on.

DISCUSSION -----

What you're seeing is a result of the ImageWriter LQ thinking there is a paper-out condition. The paper sensor itself is most likely the culprit.

There is a section in Tech Procedures outlining a voltage check of the sensor (page 4.19, Cross Family Peripherals Vol. III), that should tell you if this is actually the problem.
