LaserWriter: Where To Find AppleCat Setup Information

Article Created: 13 August 1991

* RESTRICTED: Apple Internal and Support Providers Only *
Not For General Public Release

TOPIC -----

When running the AppleCat program on a Macintosh to check a LaserWriter II, what are the test cables that need to be connected?

DISCUSSION -----

There is no AppleCat program for the LaserWriter II series of printers. Only for the LaserWriter Plus. There are however diagnostics that you can run. To find out how to set them up and what cables you will need, check the Technical Procedures Manual, Laser Printers, Volume Two, Page 7.4. Copyright 1991 Apple Computer, Inc.
