TOPIC -----

What are the correct voltage readings for connector J15 on the LaserWriter 600 and 630 I/O controller board?

DISCUSSION -----

Connector J15 on the LaserWriter Pro 600/630 is used to provide +5 volts DC to the I/O controller board. It is a 4 pin connector that originates at the DC power supply. Here is a listing of the pinouts:

Pin#	Description	Color
1	Ground	Blue
2	Ground	Blue
3	+5 volts	Brown
4	+5 volts	Brown

Voltage measurements should be made while the I/O controller board is connected to J15.
