TOPIC -----

I need information regarding the Light Meter, Apple P/N 076-0310, which is used to measure the luminance of Apple Displays.

I had one, and ordered another using the same part number, but received a different meter.

P/N	Name
076-0310	SEKONIC multi-lumi MODEL L-248, old model
076-0310	SEKONIC Handy Lumi MODEL L-246, present model

Each product provides different functions, but have the same Apple part number.

DISCUSSION -----

You are correct, the L-248 and L-246 light meters are both used to measure screen luminance, but their scales are completely different. The old light meter (L-248) is no longer available and has been replaced with the new light meter (L-246) and retains the same service part number.
