TOPIC -----

How can I place the LaserWriter 16/600 PS printer into the diagnostic mode since it doesn't have a 9-pin serial port?

DISCUSSION -----

Unlike the LaserWriter Pro 630, the LaserWriter 16/600 PS does not come with a 9-pin serial port. In order to place the printer into the diagnostic mode, you must jumper pins 1 & 2 of the Mini Din-8 serial connector.

Service parts will offer a diagnostic jumper in the future.
