TOPIC --

I cannot change the Ethernet zone of our LaserWriter 16/600 PS printer using a
Macintosh on LocalTalk. There is a router between the two, so why is this not
possible?

DISCUSSION ---

You are correct. A LocalTalk client should be able to change the desired
Ethernet zone of the LaserWriter 16/600 PS if it is on a multi-zone Ethernet
network. This functionality has been available with previous Ethernet Apple
Printers in combination with the LaserWriter Utility.

We believed you've found a problem with the LaserWriter 16/600 PS as we were
able to reproduce this problem. We will be investigating these issues further
with engineering, but for now, the ONLY way to change the printer's Ethernet
zone is using an Ethernet client.
