TOPIC -----

A customer of ours has a LaserWriter Select 610 and needs to purchase a toner cartridge for it. We have been unable to find any documentation telling us about this printer and the proper toner cartridge to use. What is the LaserWriter Select 610 and which toner cartridge does it use?

DISCUSSION -----

The LaserWriter Select 610 was designed specifically for the Japanese printer market and is not available outside of Japan. The print engine and toner cartridge used in it are identical to those found in the LaserWriter Select 360. The main difference between the LaserWriter Select 610 and a LaserWriter Select 360 is that the LaserWriter Select 610 uses a different I/O controller board which supports Kanji and it has an internal hard drive. Customers who bring the LaserWriter Select 610 to countries other than Japan should purchase the M1960G/A LaserWriter Select toner cartridge which is compatible with the LaserWriter Select 300, LaserWriter Select 310, LaserWriter Select 360, and LaserWriter Select 610 printers.
